Faraday Bags and Enclosures

PROTECT YOUR DATA

NO SIGNAL

We believe that with the ever-increasing amount of electromagnetic wave creation, we are responsible to manage its impact.

At Faraday Defense, our mission is full-scale wave management. We produce a wide range of products that offer radio frequency (RF) shielding, data security, and electromagnetic pulse (EMP) protection. These products are specifically engineered to mitigate the impact of signal-producing devices on health and security. Our series of solutions include Faraday bags, Faraday tents, CYBER® Faraday fabrics, and EMC Chambers.

NEST-Z Series

The Faraday Defense NEST-Z EMP Bag is crafted to shield electronics from detrimental electromagnetic radiation and electrical currents that pose a threat to their integrity. Aluminum layers create a static-safe environment for sensitive electronic devices. Strong, heavy-gauge polyester layers serve as a protective barrier, deterring sharp objects from puncturing and compromising the bag's efficacy. The NEST-Z bag is designed to be heat-sealed and is suitable for vacuum packing.

Faraday Bags and Enclosures / NEST-Z Series / EMP Faraday Bags

NEST-Z EMP 7.0 mil Faraday Bag

The Faraday Defense NEST-Z EMP Bag is designed to protect electronics against harmful electromagnetic radiation and electrical currents that would otherwise destroy them. Aluminum layers provide a static-safe environment for sensitive electronic devices. Strong, heavy-gauge, polyester layers help prevent sharp objects from puncturing and destroying the bag's effectiveness. The NEST-Z Bag is heat-sealable and suitable for vacuum packing.

Material

- 2 - Heavy-gauge, Static-dissipating, Polyester Layers
- 2 - Aluminum Barrier Shield Layers
- 1 - Polyester Inner Layer, for added strength

Product Details

- 33 lbs Puncture Resistance (FTMS 101-C, 2065.1)
- 11,500 PSI Tensile Strength
- >50 dB EMI Attenuation (MIL-PFR-81705-REV.D)
- ANSI/ESD S20.20 Compliant
- 12 Ohms / sq in Surface Resistance (ASTM 1-257)
- RoHS Compliant and Lead-free
- Made in the USA

Heat Sealing Conditions

- Temperature (400 degrees F, 204 degrees C)
- Time (.6 to 4.5 seconds)
- Pressure (30 – 70 PSI, 206-482 kPa)

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

FEATURES

Zip-lock Closure	Secure zip-lock closure allows for easy reclosure. For extra protection, bags can also be heat-sealed.
7.0 mil	Moisture barrier, 7.0 mil, 5-layer bags are heavy gauge and offer optimal EMP protection.
Durability	NEST-Z Bags are tested for durability and have proved to be highly resilient with tear and puncture resistance.
Multiple Sizes	NEST-Z Bags are designed to nest inside each other for maximum protection and to fit a variety of standard equipment.

5 PLY TEAR-RESISTANT ALUMINIZED POLYESTER

NEST-Z EMP 70 mil Faraday Bags

NEST-Z bags are the highest-rated, zip-lock closure, electro-shielding bags on the market, making them ideal for packaging and transporting high-value, sensitive electronic parts, military equipment, and medical devices. We offer a wide range of convenient sizes.

NX3 Series

Protect your devices from hacking, tracking, and EMF output with the NX3 bag. These bags are suitable for shielding all types of devices, including: solar panels, laptops, tablets, radios, cell phones, key fobs, credit cards, small hard drives and USB drives. The NX3 bag has three layers of CYBER NC (Nickel/Copper) fabric and is tested and proven to be effective with 85-90dB attenuation. It is a favorite among law enforcement for evidence security and retail customers for personal security.

Faraday Bags and Enclosures / NX3 Series / Fabric Forensic Bags

NX3 CYBER Fabric Forensic Bag

The NX3 Faraday bag by Faraday Defense is one of the highest performing bags available. We are taking shielding to the next level with three layers of CYBER NC (Nickel/Copper) fabric, ensuring that you and your devices are protected.

Designed to Block Signal

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- **>85 dB** attenuation (400 MHz-40 GHz)
- Non-window design

Material

Nickel/Copper-plated Polyester

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the Velcro on the folded portion of the bag.
2. Insert the device into the bag.
3. Close by double-folding the top and fastening the Velcro shut.

FEATURES

Velcro Closure	NX3 bags have a double-fold Velcro seal for enhanced blocking and tight closure.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Performance	NX3 Bags are designed for performance with their streamlined design and highly-effective material.
Multiple Sizes	Our bags are offered in various sizes and specifically designed to fit all standard-sized devices.

NX3 Fabric Forensics Bags

The NX3 Faraday bags by Faraday Defense are designed for military, police departments, forensic investigators, government, executive travel, and personal data security. These high-performance bags are very effective in signal isolation, EMF reduction, and EMP protection.

JACKET Series

The JACKET Faraday bag is one of our most versatile and effective bags. These bags are designed for endurance and performance. Similar to our NX3 bags, the JACKET has three layers of nickel-copper CYBER NC fabric for maximum shielding. JACKET bags have a heavy-duty, water-resistant outer layer. This line of bags includes CORDURA® and Berry Compliant options.

Faraday Bags and Enclosures / JACKET Series / Forensic Bags

JACKET Faraday Forensic Bag

The JACKET Faraday Bag is one of our most versatile and effective bags. Designed for endurance and performance, this bag has all the features of our NX3 bag plus an additional durable, nylon, canvas exterior layer, ensuring protection. The JACKET effectively blocks signal with three layers of CYBER NC (Nickel/Copper) fabric. Additionally, the secure Velcro closure is convenient for quick access to your device.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)
- Non-window design

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, Nylon, Canvas Outer Layer

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the Velcro on the folded portion of the bag.
2. Insert the device into the bag.
3. Close by double-folding the top and fastening the Velcro shut.

FEATURES

Velcro Closure	JACKET bags have a double-fold Velcro seal for enhanced blocking and tight closure.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	JACKET Bags are made with high-quality materials and constructed for endurance and durability.
Multiple Sizes	Our bags are offered in various sizes and specifically designed to fit all standard-sized devices.

JACKET Faraday Forensic Bags

The JACKET Faraday Bags keep devices safe and secure by blocking cell signal, GPS, RFID, and Wi-Fi, maintaining the devices' integrity and preventing remote influences from accessing content. The bags are crafted with high-quality blocking material and precise stitching. Interior measurements are listed below.

SKU	NAME	WIDTH	LENGTH	DEPTH
74302	Key Fob JACKET	3"	4"	0.15"
74307	JACKET	4.5"	8"	0.20"

74309	JACKET XXL	14"	16"	0.20"

Faraday Bags and Enclosures / JACKET Series / CORDURA® Bags

CORDURA® JACKET Faraday Bag with Magnetic Closure

The CORDURA® JACKET Bag is not only versatile and effective but also extremely heavy-duty. Designed for endurance and performance, this bag has all the features of our regular JACKET bag but with the added features of a water and puncture-resistant CORDURA® outer layer and a **magnetic closure**. The CORDURA® JACKET effectively blocks signal with three layers of CYBER NC (Nickel/Copper) fabric. Additionally, the secure magnetic closure is convenient for quick access to your device.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- **>85 dB** Attenuation (400 MHz-40 GHz)
- Non-window design

Material

- Nickel/Copper-plated, Polyester Lining
- Heavy-Duty, CORDURA® Outer Layer

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the magnets on the folded portion of the bag.
2. Insert the device into the bag.
3. Close by double-folding the top and fastening the magnets shut.

FEATURES

Magnetic Closure	CORDURA® JACKET bags have a double-fold, magnetic seal for enhanced blocking and tight closure.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	CORDURA® JACKET Bags are made with high-quality materials and constructed for endurance and durability.
Multiple Sizes	Our bags are offered in various sizes and specifically designed to fit all standard-sized devices.

CORDURA® JACKET Faraday Bags

The CORDURA® JACKET Faraday Bags keep devices safe and secure by blocking cell signal, GPS, RFID, and Wi-Fi, maintaining the devices' integrity and preventing remote influences from accessing content. The bags are crafted with high-quality blocking material and precise stitching. Additionally, the CORDURA® outer layer makes these bags water and puncture-resistant. Interior measurements are listed below.

Faraday Bags and Enclosures / JACKET Series / Dry Bag

JACKET Faraday Key Fob Dry Bag

The JACKET Key Fob Dry Bag provides ultimate protection against car theft. Car thieves can boost the signal of a key fob while near a parked vehicle, allowing them to get into the vehicle and drive away. Safeguard your key fob from hacking, GPS tracking, RFID scanning, and unwanted Wi-Fi access with this compact and powerful Faraday pouch. The Key Fob JACKET blocks signal from being accessed and boosted, keeping a vehicle protected while not in use. It can also be used for USBs, SSDs, and credit cards. The bag measures 4.75" x 2.75" and offers >85 dB attenuation (400 MHz-4 GHz). It is made with black, heavy-duty, water-resistant TPU and a tight, double-fold, magnetic closure to keep keys safe and dry.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)
- Non-window design

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, Water-resistant, TPU Outer Layer

Universal Shielding

Designed for universal shielding key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the folded portion of the bag.
2. Insert the device into the bag.
3. Close by double-folding the top and fastening the magnetic closure.

FEATURES

Magnetic Closure	The Key Fob JACKET has a double-fold, magnetic seal for enhanced blocking and tight closure.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	JACKET Bags are made with high-quality materials and constructed for endurance and durability.
Water Repellant	Constructed with a water-resistant, TPU outer layer, this bag is designed to protect key fobs and other small electronics from the elements.

JACKET Faraday Key Fob Dry Bag

Stop vehicle theft with the JACKET Faraday Key Fob Dry Bag. We are taking shielding to the next level with triple layers of >85 dB (400Mhz-4Ghz) CYBER® NC fabric along with an outer layer of durable, water-resistant TPU, ensuring that your device is protected from key fob, signal-boosting car theft. Our secure, double-fold, magnetic closure is easy to open for quick access to your keys. The slim profile expands to accommodate bulky key fobs and key chains. It can also be used for USBs, SSDs, and credit cards. When your keys and other devices are in the bag, their security is protected.

SKU	NAME	WIDTH	LENGTH	DEPTH
14707	JACKET Key Fob Dry Bag	4.75"	2.75"	0.20"

Berry CORDURA® JACKET Bag

The CORDURA® Berry Compliant JACKET Faraday Bag has all the advantages of the Original JACKET. Additionally, the CORDURA® 1000 Denier (1000D) Coated Nylon Fabric has proven performance in the world's toughest environments. These bags are resistant to abrasion, have an excellent tear strength, and are water repellent. Built for endurance, they are constructed with extra-thick bindings and bar tacking on the corners for reinforcement. Proudly made in the USA from 100% domestically-sourced raw materials, these bags are ready for military and police contracts, meeting all military specs.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)
- Non-window design

Material

- Nickel/Copper-plated, Polyester Lining
- Durable CORDURA® Outer Layer

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the Velcro on the folded portion of the bag.
2. Insert the device into the bag.
3. Close by double-folding the top and fastening the Velcro shut.

FEATURES

Velcro Closure	CORDURA® JACKET bags have a double-fold, Velcro seal for enhanced blocking and tight closure.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	CORDURA® JACKET Bags are made with high-quality materials and constructed for endurance and durability.
Multiple Sizes	Our bags are offered in various sizes, specifically designed to fit all standard-sized devices.

What is Berry Compliance?

Berry Compliant means this product is made in the USA and constructed from USA-sourced materials. This is not only pertinent for the Department of Defense, but for the individual consumer as well. Selecting Berry Compliant products guarantees you are not only sourcing "Made in the USA" or locally made products, but in essence, you are supporting American raw goods, manufacturing, and production.

CORDURA® Berry Compliant JACKET Faraday Bags

The CORDURA® Berry Compliant JACKET Faraday Bags come in multiple sizes and offer >85 dB attenuation (400 MHz-40 GHz). The durable CORDURA® 1000 Denier outer layer is puncture and heat resistant. Lined with three layers of high-quality Faraday fabric, these bags block cell signal, GPS, RFID, and Wi-Fi. All components are made in the USA. Interior measurements are listed below.

UTILITY Series

Our CORDURA® Berry Compliant bags are proudly made in the USA of 100% domestically-sourced raw materials. Proven performance in the world's toughest environments, the outer layer of CORDURA® 1000 Denier (1000D) Coated Nylon Fabric is resistant to abrasion, has an excellent tear strength, and is water repellent. Shielding levels exceed 85 dB attenuation (400MHz-40GHz), blocking cell signal, GPS, RFID, and WiFi. This is achieved with triple inner layers of premium, CYBER Berry-RS, metal-plated, nylon-based, ripstop fabric. They are a favorite among military and law enforcement for privacy and evidence security.

CORDURA® Wide-Mouth Deluxe Utility Series Faraday Bag

The CORDURA® Berry Compliant Wide-Mouth Deluxe Utility Series Faraday Bag comes in multiple sizes and offers >85 dB attenuation (400 MHz- 40 GHz), anti-tracking, and anti-hacking. The durable CORDURA® outer layer is puncture and heat-resistant. The removable Faraday roll-top pouch is lined with three layers of high-quality blocking material and quality precision stitching. The bag blocks cell signal, GPS, RFID, and Wi-Fi signal. Bags are conveniently sized to fit many types of devices, including: key fobs, cell phones, external hard drives, tablets, standard laptops, and other electronic gear. All components are made in the USA.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)
- Non-window design

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, CORDURA® Outer Layer

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by unzipping the top.
2. Unclip the buckle at the top of the liner and unfold.
3. Insert gear into the bag.
4. Close by double-folding the liner downward and then folding the sides up to secure the top buckle.
5. Zip the bag closed.

FEATURES

Secure Closure	CORDURA® Wide-Mouth Utility Faraday Bags have a double-fold and buckled closure for enhanced blocking.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	CORDURA® Wide-Mouth Utility Bags are made with high-quality materials and constructed for endurance and durability.
Multiple Sizes	Our bags are offered in various sizes, specifically designed to fit all standard-sized devices.

CORDURA® Wide-Mouth Deluxe Utility Series Bags

The Faraday Defense Wide-Mouth Deluxe Utility Series Bags are constructed with durable 1000 Denier CORDURA® textured nylon. These bags feature a removable/replaceable clip-in Faraday interior pouch with six interior slip pockets. The opening is as wide as the base of the bag and maintains its shape while open, allowing easy access to the Faraday compartment and electronics. A heavy-duty YKK zipper closing keeps transportation of electronics safe. The comfortable Velcro grip handle makes it easy to grab and go.

DRY Series

Faraday Defense Dry Bags stand out for their durability, water-resistant construction, and high-performance design. These bags are exceptionally effective, featuring three layers of CYBER NC (Nickel/Copper) lining the interior to ensure EMP protection, RF/EMF shielding, and enhanced location privacy. Furthermore, the bags have a tarpaulin exterior and a secure, tight closure, guaranteeing your gear stays dry even in challenging conditions. With their comfortable and functional designs, these bags are versatile and well-suited for a wide range of applications.

Faraday Bags and Enclosures / DRY Series / Faraday Dry Backpack

Faraday Dry Bag Backpack

The Faraday Dry Bag Backpack is designed for travel and storage of laptops, tablets, radios, and more. This backpack will keep your gear dry and secure with its watertight seal and signal-blocking design. Three layers of CYBER NC (Nickel/Copper) line the interior, providing EMP protection, RF/EMF shielding, and location blocking. Additionally, there are two mesh pockets on either side of the backpack for holding drinks or smaller gear. With comfortable straps and mesh padding on the back, this bag has a convenient design and is comfortable to wear. The Faraday Dry Bag Backpack measures 11" L x 6" W x 16" H when closed.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, Tarpaulin Outer Layer

Color

Stealth Black

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the clips on the side of the bag.
2. Insert the gear into the bag.
3. Close by double-folding the top and fastening the side clips shut.
4. Tighten the side straps if needed.

FEATURES

Tight Closure	Faraday Dry Bag Backpacks have a double-fold closure with buckles for enhanced blocking and a tight, water-resistant closure seal.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	Faraday Dry Bag Backpacks are made with high-quality materials and constructed for endurance and durability.
Convenience	This backpack has a user-friendly design, with comfortable shoulder straps, a padded mesh back, and a spacious interior for gear.

Faraday Bags and Systems / DRY Series / Faraday Dry Sling Pack

Faraday Dry Bag Sling Pack

This FARADAY Dry Bag Sling Pack is perfect for transporting or storing your sensitive, high-value electronics and keeping them secure from wireless signals and water. Your valuables will be kept dry, away from the grid, and protected from the damage an EMP would cause your gear. The Sling Pack comes in three convenient sizes: 10L, 20L, & 30L. The roomy interiors fit laptops, tablets, radios and more. Lined with triple layers of CYBER NC, along with a tight roll closure, this bag provides signal-blocking protection and a water-tight seal. The resilient tarpaulin exterior is puncture resistant and water repelling. Strong, reinforced seams give this bag endurance and durability you can depend on. Two shoulder straps, multiple quick-release straps, and a water-resistant exterior side pocket complete this minimalist design.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, Tarpaulin Outer Layer

Color

Stealth Black

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the clips on the side of the bag.
2. Insert the gear into the bag.
3. Close by double-folding the top and fastening the buckles together at the top.

FEATURES

Tight Closure	Faraday Dry Bag Sling Packs have a double-fold closure with a secure buckle for enhanced blocking and water-resistance.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	Faraday Dry Bag Sling Packs are made with high-quality materials and constructed for endurance and durability.
Convenience	These sling packs have a user-friendly design, with top handle or shoulder strap carry options, spacious interior, and a front pocket.

SKU	SIZE	DIMENSIONS
14023	10 Liters	7.75" L x 7.75" W x 14.5" H
14024	20 Liters	9.75" L x 9.75" W x 16" H
14025	30 Liters	11" L x 11" W x 20" H

Faraday Bags and Enclosures / DRY Series / Faraday Dry Duffel Bag

Faraday Dry Duffel Bag

The Faraday Dry Duffel Bag is durable and built for performance. It is extremely effective, with three layers of CYBER NC (Nickel/Copper) lining the interior, providing EMP protection, RF/EMF shielding, and location privacy. Additionally, this bag will keep your gear dry with its tarpaulin exterior and tight closure. With a comfortable shoulder strap and reinforced carrying handles, this bag is durable and easy to carry. An extra strap across the top ensures a secure closure for optimal performance. The Dry Duffel Bag measures 24" L x 12" W x 12" H when closed.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, Tarpaulin Outer Layer

Color

Stealth Black

Universal Shielding

Designed for universal shielding of all laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the clips on the side of the bag.
2. Insert the gear into the bag.
3. Close by double-folding the top and fastening the side clips shut.
4. Tighten the side straps if needed.

FEATURES

Tight Closure	Faraday Dry Duffel Bag has a double-fold closure with secure buckles for enhanced blocking and a tight, water-resistant seal.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	Faraday Dry Duffel Bags are made with high-quality materials and constructed for endurance and durability.
Convenience	This duffel bag has a user-friendly design, with a comfortable, padded shoulder strap, reinforced carrying handles, and a spacious interior.

14019	Faraday Dry Duffel Bag - Stealth Black

Faraday Bags and Enclosures / DRY Series / Faraday Dry Generator Bag

Faraday Dry Generator Bag

The Faraday Dry Generator Bag is designed for travel and storage of generators, solar panels, computer towers, and equipment. This bag will keep your gear dry and secure with its watertight seal and signal-blocking design. Three layers of CYBER NC (Nickel/Copper) line the interior, providing EMP protection, RF/EMF shielding, and location blocking. The Dry Generator Bag features MOLLE webbing on the front and back for attaching smaller gear. With multiple handles and tightening straps, the bag has a sleek design that is easy to carry.

Designed for Efficient Signal Blocking

- Blocks Bluetooth, Wi-Fi, Cell Signal, GPS, and RFID
- Dissipates signals from both exterior and interior sources
- Protects devices from hacking and tracking
- >85 dB Attenuation (400 MHz-40 GHz)

Material

- Nickel/Copper-plated, Polyester Lining
- Durable, Tarpaulin Outer Layer

Color

Stealth Black

Universal Shielding

Designed for universal shielding of generators, solar panels, large electronics, computer towers, laptops, tablets, cell phones, key fobs, credit cards, small hard drives, and USB drives.

Usage Instructions

1. Open by loosening the clips on the sides and top of the bag.
2. Insert the gear into the bag.
3. Close by double-folding the top and fastening the side clips shut.
4. Fasten clips over the rolled top.
5. Tighten all straps as needed.

FEATURES

Tight Closure	Faraday Dry Generator Bags have a double-fold closure with secure buckles for enhanced blocking and a tight, water-resistant seal.
3 Fabric Layers	Three layers of specialized, metal-plated fabric effectively block communication of signals to and from devices.
Durability	Faraday Dry Generator Bags are made with high-quality materials and constructed for endurance and durability.
Convenience	These generator bags have a user-friendly design with multiple carrying straps and MOLLE webbing across the front and back of the bag.

SKU	NAME	DIMENSIONS (Closed)
74318	Small Faraday Dry Generator Bag	11" Lx15.5" Wx20" H
14553	Faraday Dry Generator Bag	30" Lx24" Wx24" H

TENT Series

Faraday Defense offers a wide range of custom RF/EMI-shielding fabric enclosures, offering a highly portable yet top-performing alternative to traditional hardwall metal chambers. Our tents deliver complete privacy and security, boasting over 90 dB shielding attenuation. Designed and hand-crafted with premium components and materials, each enclosure is tailor-made to meet our customers' individual needs. Every aspect of our enclosures, from top to bottom, has been engineered and lab-tested to ensure unparalleled results.

Faraday Bags and Enclosures / TENT Series / Tabletop Enclosures

Faraday Tabletop Enclosure

The Faraday Tabletop Enclosure enables maximum comprehensive security for forensic and anti-espionage operations. The Faraday Tabletop Enclosure secures an area so that investigators may operate in a protected field. This soft enclosure offers a high-performance alternative to hardwall metal chambers and provides **>90dB** shielding effectiveness, with portable to semi-permanent design options. Every enclosure includes double-wall construction, double-magnetic closure, positive air ventilation, shielded power, Ethernet, and LED lighting. The Tabletop Enclosure is fully customizable to meet our customer's needs. This product is suitable for commercial use and is made in the USA.

Uses

- EMI testing
- Aerospace applications
- Military applications
- Forensics applications
- Medical device testing
- Telecommunication testing
- IOT testing

Material

- Silver/Nickel/Copper-plated Polyester
- Aluminum Frame

Included Accessories

- Two shielded honeycomb vents
- Lower intake with fan and sleeve
- Upper exhaust
- Power strip
- Extra connectors
- Tensioning accessories
- Protective bags
- Rip repair kit
- Custom I/O plate filters - contact for specifications

FEATURES

Accessible Interior	Tabletop enclosures comfortably accommodate most equipment and gear.
Signal Blocking	Enclosures are built with double layers of metal-plated shielding fabric, and the heavy-duty seams are sewn with Faraday thread.
Portable Design	The enclosure walls are mounted on a heavy-duty aluminum tube frame that can be easily dismantled for transport.
High Performance	Our enclosures include double-wall construction, double-magnetic closure, positive air ventilation, shielded power, and Ethernet.

Faraday Tabletop Enclosures

The Faraday Defense Tabletop Enclosures offer optimum protection. Using Silver/Copper/Nickel conductive fabric and utilizing a double-magnetic strip door, the enclosure delivers maximum isolation from signals. The Faraday Defense Tabletop Enclosures allow for easy setup and break down when quick deployment is needed. RF/EMI tabletop enclosures offer an affordable alternative to traditional hardwall chambers and match shielding effectiveness in comparison.

SKU	NAME	WIDTH	HEIGHT	DEPTH

74854	Faraday Tabletop Enclosure - L	4'	4'	4'

Faraday Bags and Enclosures / TENT Series / LX Faraday Tents

LX Faraday Tent

The LX Faraday Tent enables maximum comprehensive security for forensic and anti-espionage operations. The tent secures an entire area so that investigators may operate in a protected field. This soft enclosure offers a high-performance alternative to hardwall metal chambers and provides **>90 dB** shielding effectiveness, with portable to semi-permanent design options. Every tent includes double-wall construction, double-magnetic closure, positive air ventilation, shielded power, Ethernet, LED lighting, and is fully customizable. All of our tents are suitable for commercial use and made in the USA.

Uses

- EMI testing
- Aerospace applications
- Military applications
- Forensics applications
- Medical device testing
- Telecommunication testing
- Satellite testing
- IOT testing

Material

- Silver/Copper/Nickel-plated, Polyester Lining
- Durable, 100% Nylon Outer Layer

Included Accessories

- Two shielded honeycomb vents
- Lower intake with fan and sleeve
- Upper exhaust
- Power strip
- Extra connectors
- Tensioning accessories
- Protective bags
- Rip repair kit
- Custom I/O plate filters - contact for specifications

FEATURES

Convenient Entry	The tent enclosure features a convenient entry for personnel and testing devices. Optional: Interior entry-door access.
Signal Blocking	Tents are built with double layers of metal-plated shielding fabric. Additionally, the heavy-duty seams are sewn with conductive thread.
Portable Design	The tents are mounted on a heavy-duty aluminum tube frame that can be easily dismantled for transport. Optional: Inflatable frame.
High Performance	Every tent includes double-wall construction, double-magnetic closure, positive air ventilation, shielded power, and Ethernet.

LX Faraday Tent Enclosures

The Faraday Defense Tent Enclosure offers optimal blocking capabilities. Using Silver/Copper/Nickel conductive fabric and utilizing a double-magnetic strip door, the tent delivers maximum isolation from EMF. The Faraday Defense Tent Enclosure allows for easy setup and break down when quick deployment and security is needed. RF/EMI tents offer an affordable alternative to traditional hardwall chambers and match shielding effectiveness in comparison. Faraday Defense Tent Enclosures are offered in standard sizes, or an enclosure can be designed and built to custom specifications.

SKU	NAME	WIDTH	DEPTH	HEIGHT

HARDWALL Series

RF-shielded Hardwall enclosures allow for a secure chain of custody space that is protected from any outside attempts at manipulating or interfering with data or devices. They also block bluetooth, Wi-Fi, and cell signals. Our Hardwall Enclosures are extremely secure with a shielding effectiveness of >90 dB attenuation in the range of 30 MHz to 18 GHz and >92 dB attenuation in the range of 400 MHz to 40 GHz. Faraday Hardwall Enclosures are available in any size and can be custom designed to better fit your needs. They offer high-grade protection and are both affordable and versatile.

Forensic Hardwall Enclosure

The Forensic Hardwall Enclosure enables maximum comprehensive security for forensic chain of custody and anti-espionage operations. The enclosure secures an entire area so that investigators may operate in a protected field. The standard Faraday Defense Forensic Hardwall Enclosure offers 104 cubic feet of space within the structure to comfortably accommodate an operator with space for a small desk and equipment. Minimum signal attenuation is **>90dB** over a range of frequencies from 30MHz to 18GHz or **>92 dB** for frequencies 400MHz to 40GHz, measuring through the wall at multiple locations. Faraday Defense Forensic Hardwall Enclosures are offered in standard sizes or can be designed and built to custom specifications. This product is for commercial use and made in the USA.

Uses

- Forensics applications
- Aerospace applications
- Military applications
- Medical device testing
- Cross-talk elimination
- Telecommunication testing
- Satellite testing
- IOT Testing
- EMI Testing

Material

Coated Steel

Included Accessories

- Two shielded honeycomb vents
- Lower intake with fan and sleeve
- Upper exhaust
- Power strip
- Custom I/O plate filters

FEATURES

Convenient Entry	The Forensic Hardwall Enclosure features a convenient entry for personnel and testing devices.
Signal Blocking	Structures are constructed with high-grade, signal-blocking panels, resulting in superior protection and durability.
Modular Design	The enclosures are made with a shielded panel system and can be dismantled and moved by LTL transportation.
Quality Construction	Our Forensic Hardwall Enclosures are all built with tight-fitting panels and a latching door system.

Forensic Hardwall Faraday Enclosures

The Forensic Hardwall Enclosures are designed with top-quality components and materials. The enclosures are customizable to meet customers' individual needs and tested to ensure satisfaction. From top to bottom, every aspect of the enclosures are engineered to ensure unsurpassed results. Faraday Defense Hardwall Enclosures are offered in standard sizes which are designed for universal use and will accommodate various operations. Custom sizing is also available upon request.

SKU	NAME	WIDTH	DEPTH	HEIGHT
14038	Single Hardwall Enclosure	4'	4'	6.5'
14039	Double Hardwall Enclosure	8'	8'	6.5'
14040	Triple Hardwall Enclosure	12'	12'	6.5'
	Custom Hardwall Enclosure	Call 1-800-748-6052 to request a quote.		

Faraday Stainless Box Enclosure

The Faraday Stainless Box Enclosure is a premium custom-fabricated Faraday cage. Faraday cages distribute a charge or radiation around the cage's conductive exterior. It also cancels out electric charges or radiation within the cage's interior, making it a hollow conductor. The charge remains on the external surface of the cage, protecting electronics inside the box. This enclosure provides **>100dB** attenuation at 400 MHz - 40 GHz. The Stainless Box Enclosure is useful for law enforcement, forensics, military, travel privacy, and anti-tracking. Built with premium quality components, including heavy-duty latches and a sturdy set-in handle, this enclosure is built for superior performance. Box dimensions are 19.25" L x 12.25" W x 3.25" H.

Uses

- Meeting security
- Aerospace applications
- Military applications
- Forensics applications
- Device security

Material

- Stainless Steel
- Conductive Gasket

FEATURES

Heavy Duty	The box is built with a rubber insole for protection and frequency transfer reduction, and the lid is held secure with heavy-duty clasps.
Signal Blocking	Our metal box is custom-fabricated for maximum protection and comfortably accommodates most equipment and gear.
Portable Design	The Stainless Box Enclosure is custom designed with a unique flush-mount lid and handle, making it compact and easy to carry.
High Performance	With >100dB attenuation, the Stainless Box Enclosure offers superior signal isolation.

Faraday Stainless Enclosure

Premium quality components, >100dB attenuation, heavy-duty latches, flush-mount handle, and superior performance make the Faraday Stainless Box Enclosure the preferred Faraday cage for protection needs. It can be used for nesting with Faraday Defense NEST-Z or NX3 series bags. The box is durable with a rust-proof exterior and lined with a rubber insole for extra protection and frequency transfer reduction.

SKU	NAME	WIDTH	HEIGHT	DEPTH

CHAMBER Series

Faraday Defense is a leader in design-build and construction management of EMI Enclosure systems. Our chambers offer optimal protection and performance. Our chambers prevent electrical interference during IOT testing using radiation directional systems in a fully managed environment. Our chambers allow for complete isolation from the power grid, providing data privacy and protection from the damaging consequences of an EMP.

Faraday Bags and Enclosures / CHAMBER Series / NEXUS Class

NEXUS Class

NEXUS EMC Chambers provide a controlled environment, free from electromagnetic interference (EMI) and ambient RF signals entering or exiting the room. These rooms are suitable for interrogation of electronic devices, evidential proceedings, and examination rooms. Our chambers are designed with a modular construction that allows for disassembly and transport. The NEXUS chambers are made from 2mm steel panels, offering ultra-high shielding performance. Rooms can be custom designed with an industrial finish or an office-style interior with carpet and furniture. All units include lighting, power, and communication options.

Uses

- Forensics applications
- Aerospace applications
- Military applications
- Medical device testing
- Telecommunication testing
- IOT testing
- EMI testing

Material

- Steel Panels
- Steel Frame

Included Accessories

- Shielded honeycomb vents
- Lower intake with fan and sleeve
- Upper exhaust
- Power strip
- Extra connectors
- Custom I/O plate filters - contact for specifications

FEATURES

Accessible Interior	NEXUS Enclosures comfortably accommodate personnel, equipment, and gear.
Signal Blocking	Enclosures are built with steel walls and a double-door vestibule entry to ensure maximum signal blockage.
Ultra High Shielding	NEXUS Enclosures are designed for forensic and EMC testing. They are also equipped with EMP protection.
Steel Construction	Our enclosures are built with heavy-duty, steel panels, sturdy frames, and sealed, shielded doors.

STYLE	FEATURES
SCIF	Deployable, meets ASTM standards
TEMPEST	Blocks EMR emanations, meets NATO standards
Cyber Security	EMP protection, isolation technology
Forensics	Controlled environment, shields EMF/RF signals
Medical MRI	RF shielding, custom windows and doors
Medical EEG	Stable environment, sound proofing

Faraday Bags and Enclosures / CHAMBER Series / VECTOR Class

VECTOR Class

VECTOR EMC chambers are built with anechoic foam on the walls and ceiling, but the floor is left open to accommodate for large equipment and allow for a comfortable, accessible workspace. All chambers are equipped with acoustic protection, LED ambient lighting, and EMC protection, with the option of TEMPEST shielding. Our VECTOR chambers are available in any size and can be custom designed with various materials and colors.

Uses

- EMI testing
- Aerospace applications
- Military applications
- Forensics applications
- Medical device testing
- Telecommunication testing
- IOT testing

Material

- Steel Panels
- Steel Frame

Included Accessories

- Shielded honeycomb vents
- Lower intake with fan and sleeve
- Upper exhaust
- Power strip
- Extra connectors
- Custom I/O plate filters - contact for specifications

FEATURES

Accessible Interior	VECTOR Enclosures comfortably accommodate personnel, equipment, and gear.
Signal Blocking	Enclosures are built with steel walls and a double-door vestibule entry to ensure maximum signal blockage.
Ultra High Shielding	VECTOR Enclosures are designed to shield electrical interference for IOT and EMC testing.
Steel Construction	Our enclosures are built with heavy duty steel panels, sturdy frames, and sealed, shielded doors.

STYLE	DIMENSIONS
CISPR25	18 x 16.5 x 11.5 ft
MIL-STD	15 x 13.5 x 10 ft
VC3	29 x 18 x 19 ft
VC3 COMPACT	23 x 10 x 10 ft
VC5	37.5 x 24.5 x 19 ft
VC10	68 x 39 x 28 ft

Faraday Bags and Enclosures / CHAMBER Series / QUANTUM Class

QUANTUM Class

QUANTUM chambers are built with anechoic foam on the walls, ceiling, and floor to ensure the best acoustical damping, and are fully compliant for emissions and immunity testing. All chambers are equipped with LED ambient lighting and EMC protection, with the option of TEMPEST shielding. Our QUANTUM chambers are available in any size and can be custom designed with various materials and colors.

Uses

- EMI testing
- Aerospace applications
- Military applications
- Forensics applications
- Medical device testing
- Telecommunication testing
- Satellite testing
- IOT testing

Material

- Steel Panels
- Steel Frame

Included Accessories

- Two shielded honeycomb vents
- Lower intake with fan and sleeve
- Upper exhaust
- Power strip
- Extra connectors
- Custom I/O plate filters - contact for specifications

FEATURES

Accessible Interior	QUANTUM Enclosures comfortably accommodate personnel, equipment, and gear.
Signal Blocking	Enclosures are built with steel walls and a double-door vestibule entry to ensure maximum signal blockage.
Ultra High Shielding	QUANTUM Enclosures are designed to shield electrical interference for IOT and EMC testing.
Steel Construction	Our enclosures are built with heavy duty steel panels, sturdy frames, and sealed, shielded doors.

STYLE	DIMENSIONS
QC3	29 x 18 x 19 ft
QC3 COMPACT	23 x 10 x 10 ft
QC5	37.5 x 24.5 x 19 ft
QC10	68 x 39 x 28 ft

EMC Chamber Enclosures

Faraday Defense chambers provide an interference-free and simulated free-space environment. We design this highly customized product based on our clients' specifications and according to the absorption they require. With many available add-on options, we guarantee optimal performance and client satisfaction.

Key Features

- Product Brochure
- Modular Panel System
- Shielded EMC Doors
- Ferrite and Hybrid Absorbers
- Fully Customizable
- Meets Industry Standards

Additional Options

- Acoustics damping
- LED ambient lighting
- Air conditioning
- Test benches
- Turntable
- Fire detection
- DC Sockets
- Filters & Audio communication
- RF vestibules
- RF power line filters
- Internal electrical distribution
- RF signal filters
- Honeycomb waveguide air vents
- Bulkhead connector panels
- Waveguide pipe penetrations
- Custom frequency ranges

Shielding Performance

Magnetic	55 dB @ 10kHz; 95dB @ 200kHz; 100 dB @ 1 MHz.
Electric	100 dB from 15 kHz to 100 MHz
Planewave	100 dB from 100 MHz to 1 GHz
Microwave	100 dB at 10 GHz
Full Compliant Emission	Meets industry standards
Full Compliant Immunity	ISO 11452-2

Two-Year Warranty

All Faraday Defense chambers come with a standard two-year limited warranty against defective materials and craftsmanship and to retain the specified RF shielding effectiveness. Additional warranty and service plan options are available.
