

NI Nigel™ AI Advisor

Your trusted companion in NI TestStand

Nigel AI Advisor delivers contextual guidance, automation, and insights in NI software to help eliminate time consuming development tasks—boosting your productivity and impact.

What Makes Nigel Special

Optimized for Test

Unlike general-purpose AI tools, Nigel is built for test applications. It leverages our extensive domain expertise and trusted data to deliver smarter, more relevant answers so you can make faster, more informed decisions.

Fully Integrated

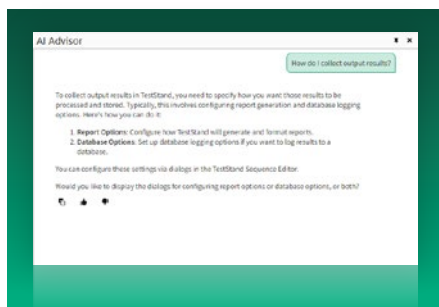

Nigel is integrated into TestStand, offering relevant suggestions based on what you're working on without the need to switch between software applications. Even better—it's included at no extra cost with existing LabVIEW+ Suite and TestStand Development subscriptions or an active service agreement.

This Is Just the Beginning

As Nigel expands across the NI platform and grows more capable, you'll gain deeper, more holistic insights into your test system. More tasks that consume valuable time will become automated, freeing you to focus on more impactful engineering work. As Nigel improves, so will you. We are committed to expanding Nigel with a clear roadmap focused on the most impactful areas of test development to deliver greater value over time.

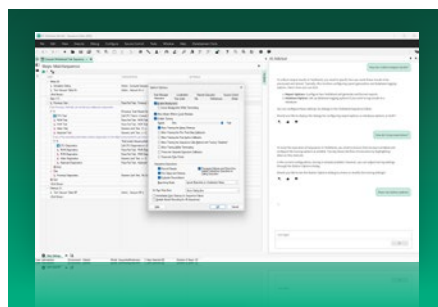

How Nigel Can Help You

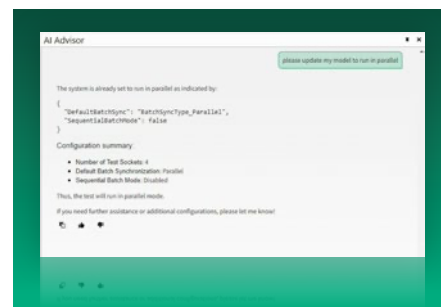

Get Development Advice

Nigel answers your questions about the TestStand engine and environment. No more scouring the internet for unreliable answers—Nigel is trained to explain concepts and functions related to TestStand, so you can make the right decisions faster.

Quickly Manage Settings

With Nigel in TestStand, finding key settings is easy. Whether you're changing execution modes or toggling specific options, there's no need to dig through levels of menus. Nigel takes you straight to what you need. Configure the TestStand engine like a pro, with Nigel guiding you every step of the way.

Get the Most Out of TestStand

Unlock the power of TestStand by leveraging its API—Nigel makes it simple. Ask Nigel to check how your sequence is running, change models, and execute runs. Just use natural language to interact with the TestStand API and speed up your test automations.

Frequently Asked Questions

Q: Is Nigel secure?

A: Yes, Nigel is built on Emerson's secure and robust cloud operations platform. It uses best-in-class OpenAI models, hosted on Microsoft Azure with enterprise-grade privacy and security guarantees.

Q: Does Nigel store my data?

A: No, Nigel only stores your prompt data locally. Emerson does not have access to your conversations with Nigel unless you explicitly share that information with us.

Q: Can I turn Nigel off?

A: Yes, Nigel is an opt-in feature that can be disabled at any time by the user.
